

Adding Notebook to Watson.

Effort: 20 mins

Objective

In this lab, you will learn:

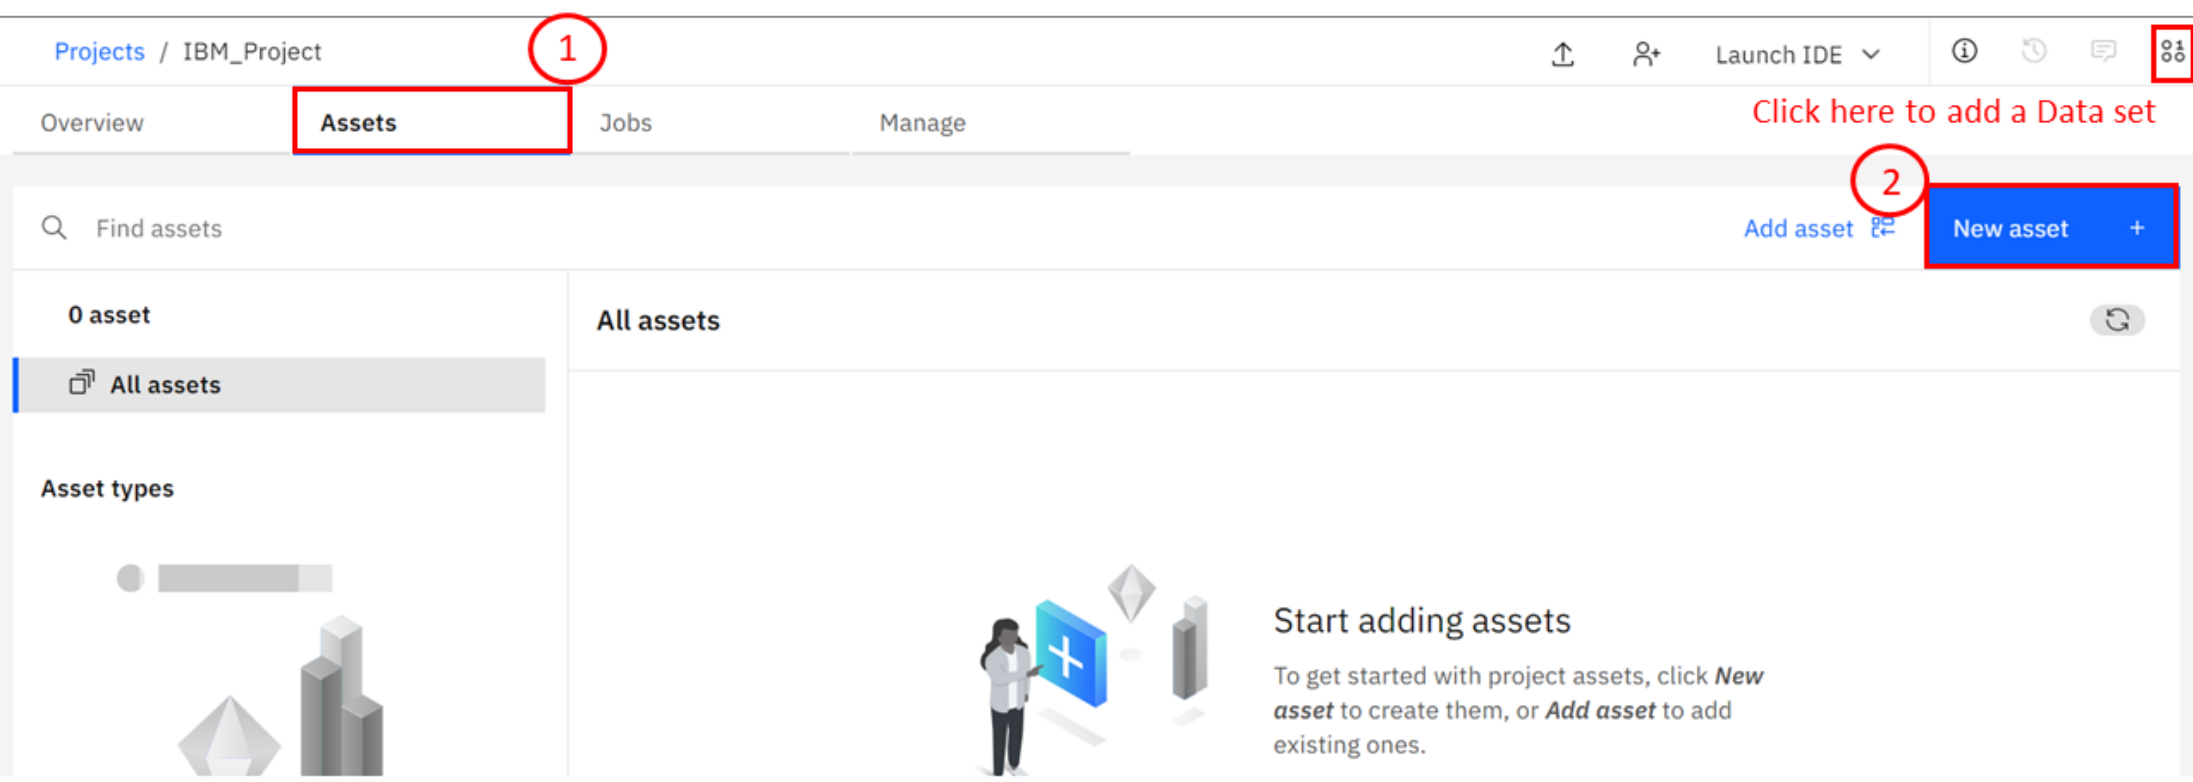

- 1. Import a Jupyter notebook in a Watson Studio Project
- 2. Perform the tasks in the Jupyter notebook

Pre-requisite: IBM Watson Setup

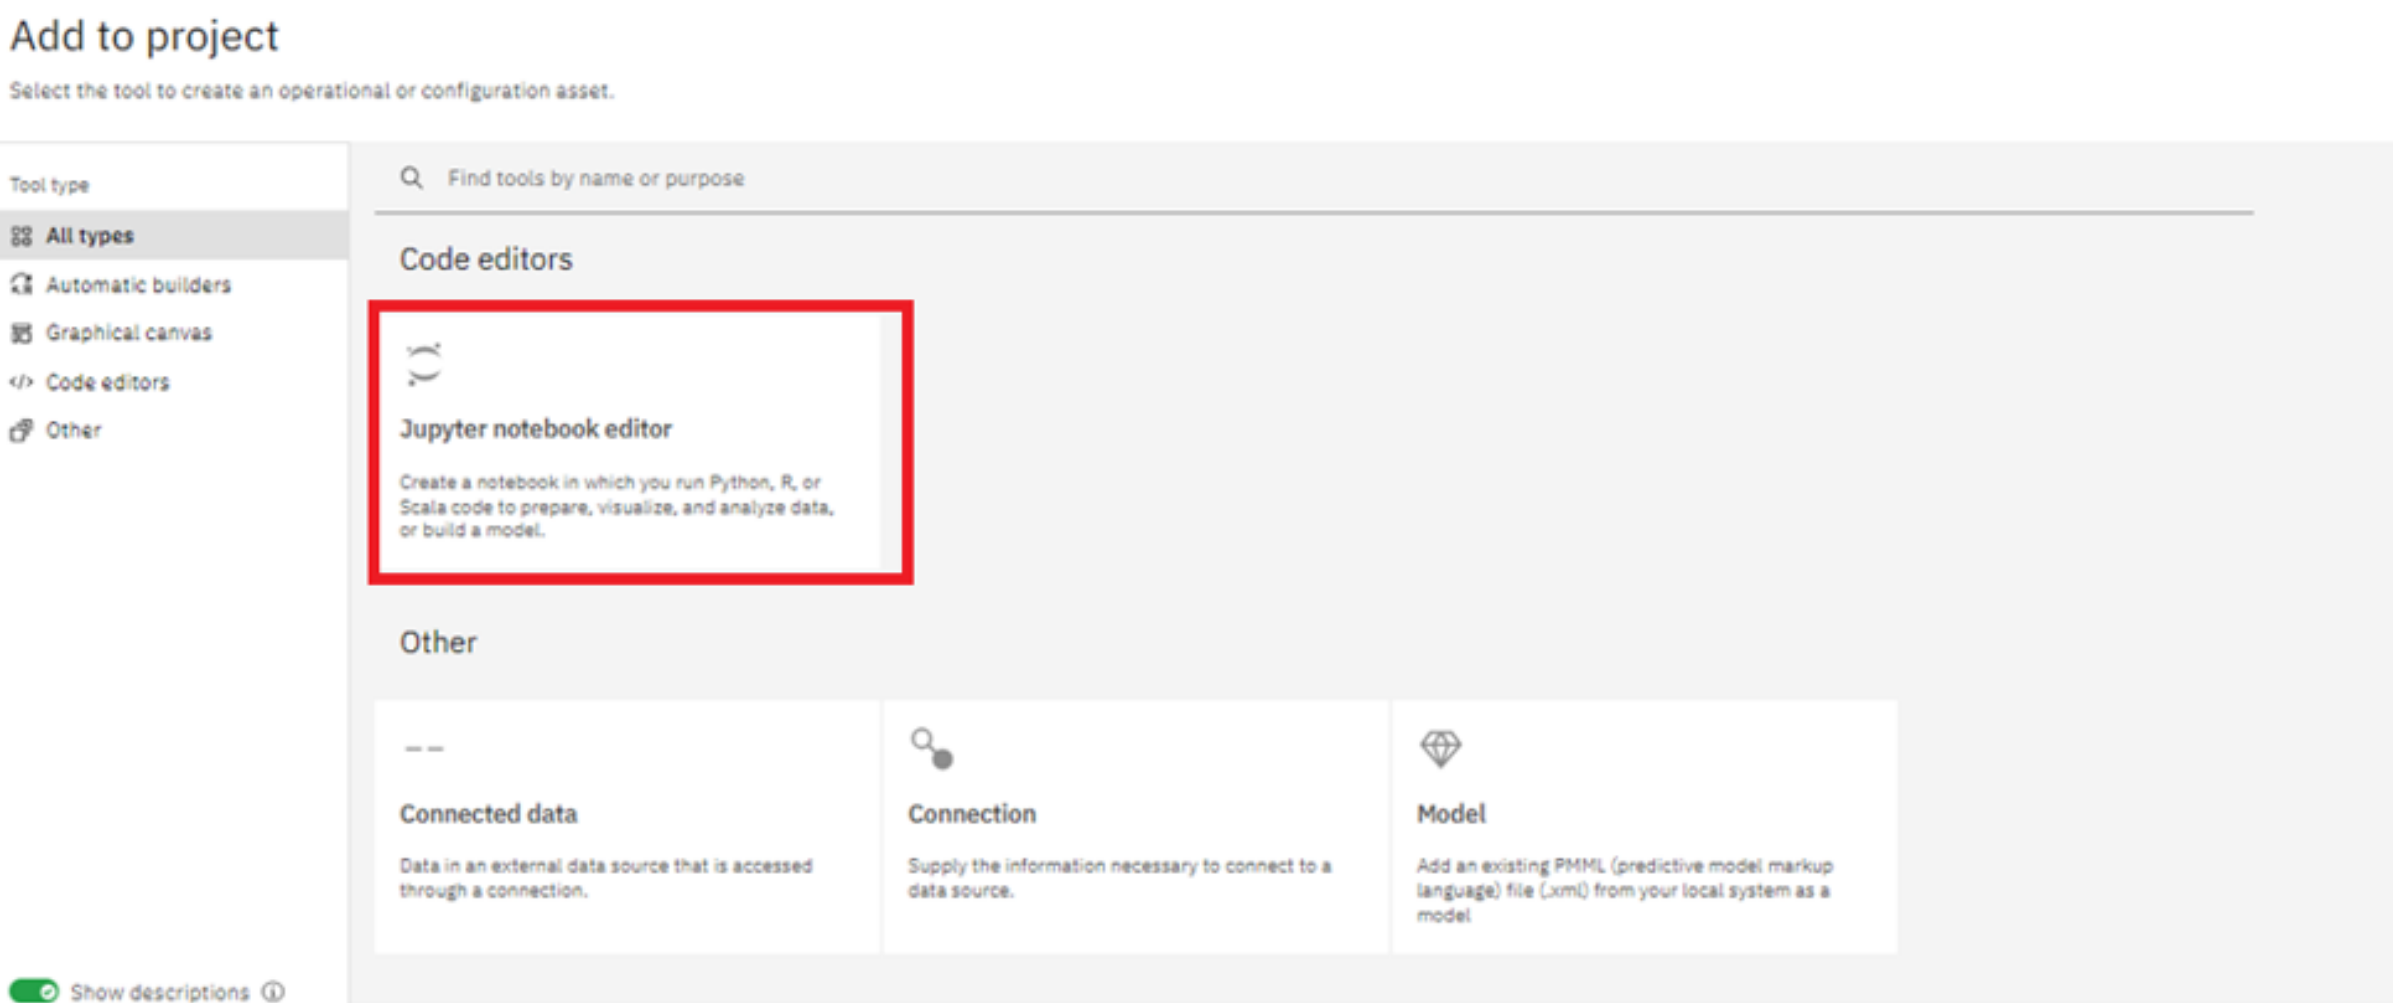

_If you have not created a Watson service and added a project in it, before proceeding with this lab please ensure you complete the previous lab: [Click Here](#)

Step 1: Adding a Notebook to the Project:

- 1. You need to add a Notebook to your project. Click on **Assets > New asset**.

- 2. Scroll down and select **Jupyter Notebook Editor**:

On the New Notebook page, enter a name for the notebook, and then click **From URL**.

Paste the URL you copied from the previous reading in the course into the **Notebook URL** box, and then click **Create**.

Note: Here the URL link is got by following the instruction in each Hands on Lab

Right-click the following link, and copy its URL then import it to Watson Studio:

- Check the example screenshot.

In case you are having issues viewing the lab instructions below or prefer to view the instructions in a new browser tab, [click here](#)

Complete the Data Collection with Web Scraping lab

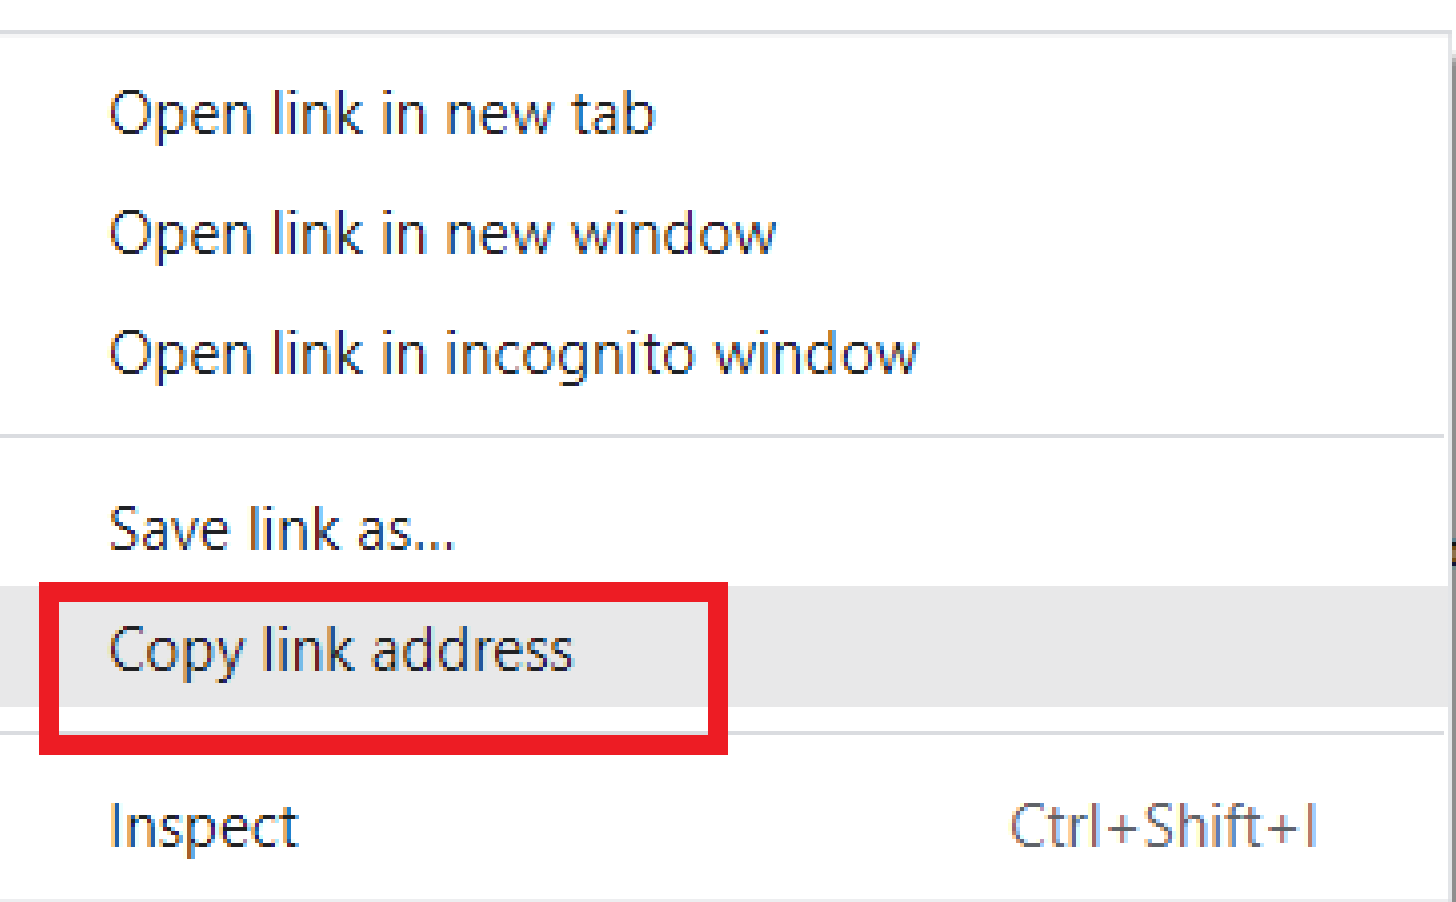

You will need to import and complete the following Jupyter notebook in IBM Watson Studio:

Right-click the following link, and copy its URL then import it to Watson Studio:

[Data Collection with Web Scraping](#)

If you need help with importing a notebook, see [Import a Notebook into Watson Studio](#)

If you see **Failed to Load Notebook**, it is a false alarm that your notebook is not found.

Check the URL in your Notebook list to see if it is a valid URL.
